Xtremedoor
Keeping the heat in and intruders out

Why Choose an **Xtreme** Composite Door?

Composite doors offer the look and feel of a timber door without any of the inherent problems, such as cracking, bowing or twisting.

They have a high-density foam core which offers excellent strength and thermal performance, and a durable Glass Reinforced Plastic (GRP) skin to protect from the elements. GRP is the same materials that is used to make the hull of lifeboats - demonstrating just how tough it really is!

And unlike timber, composite doors are incredibly low maintenance - an occasional wipe over with a damp cloth will restore it to it's original finish.

Thermal Performance

Composite doors are much more thermally efficient than other door types, and our doors are manufactured to the highest quality standards, making them more thermally efficient by design.

The way we use advanced materials to create our doors helps to reduce the heat loss from your home, helping you to save money on your energy bills and keep your home warm with the comfort of your door.

These doors are designed to provide you with the best thermal performance of the door, helping you to save money on your energy bills and keep your home warm with the comfort of your door.

York
